PAPER TRACK FOR BIG SIX-DAY BIKE RACE.

New York, Nov. 9.-The management of the annual six-day bicycle race to be held here next month is considering a proposal to construct a paper track in Madison Square Garden for the holding of the contest. All previous six-day races here have taken place on board tracks. A manufacturer has ofered to con-

struct a paper track which wil cost less and take less time to erect than the regulation wooden one. Such a track can be built in sections, and takes only about five hours to put together, while it takes about 48 hours to build the regular wooden one. It is claimed for the paper tracks that they are more durable and that greater speed can be made on them.

Six-day bicycle races held in Paris in recent years have taken place on paper tracks. No tracks of this kind have ever been used in America for the six-day races, but some of the oldthan smooth, velvety skin. And altime sport followers declare that the construction of such a track will not be altogether an innovation for America. They recall to mind that as long ago as the '80s there were roller skating rinks in this country floored with paper, in the same manner in which the paper tracks are now prepared. Indianapolis and several other cities Shap- boasted of rinks of this kind, and after trine Company, Savannah, Ga .- (Adv.) the roller skating craze began to subside some of these paper rinks were used for exhibitions in bicycle riding.
